12. Module

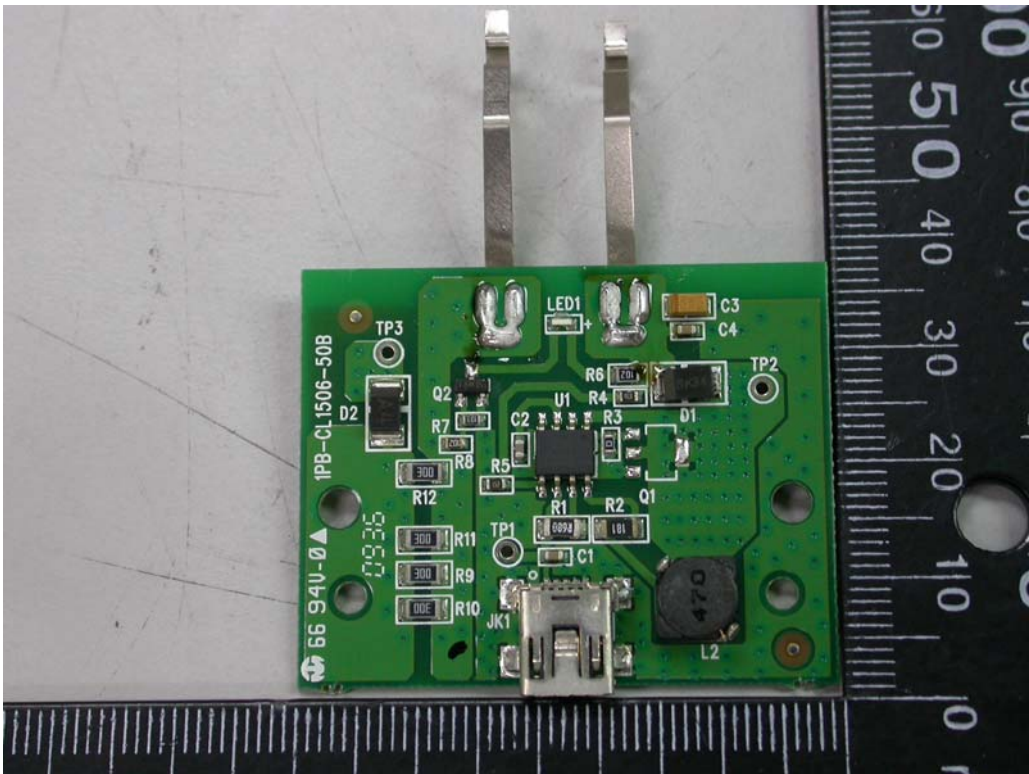

## A photograph showing a disassembled black plastic device. The left half is the front casing, which is open, revealing a green printed circuit board (PCB) inside. The PCB has various components, including two gold-colored connectors, a small black component, and some text that reads "P8-CL100F-500". The right half is the back casing, which is a solid black plastic piece. Both pieces are resting on a light-colored, slightly textured surface.
