Mounting Instructions
magnet tab

light indicator

quick release button

pairing button

tamper switch

Using the included adhesive pads or screws, mount one piece onto the moving part of your door or window, and mount the other onto your door or window frame. When your door or window is closed, the dots should be no more than 1 inch apart.

1 in. max

Top view

Keep the front side of both pieces even with each other if possible.

If needed, attach additional risers (included) to raise the height of the magnet tab.

## Quick Reference

Pairing Button

- Tap to check battery level and to page mobile app
  - long flash = battery good
  - slow blink = battery low
- Press and hold for five seconds to start pairing mode
  - fast blink = pairing mode

Tamper Switch

Sends you a notification when disengaged.

Software Update

If your sensor is updating its software, it will blink twice and pause continuously.

Mounting Instructions

light indicator

water probe

quick release button

pairing button

cable wrap

tamper switch

Using the included adhesive pads or screws, mount the larger device piece somewhere away from where you expect water. (It is not waterproof.) Mount the water sensor probe either standing up or laying down such that the water would make contact with the two gold probes.

If you are mounting the water probe using screws, remove the screw cap to expose the screw hole.

Quick Reference

Pairing Button

● Tap to check battery level and to page mobile app

━━━ long flash = battery good

● ● ● slow blink = battery low

━━━ Press and hold for five seconds to start pairing mode

● ● ● ● fast blink = pairing mode
